

Act! Premium v17 System Requirements

All minimum system requirements are based on a single-user environment (one computer accessing a local database). In a shared environment, Act! Pro is designed to work with up to 10 users and Act! Premium is designed to work with more than 10 users. Recommended server system requirements are for environments of more than one user. Customer registration and activation are required and you must purchase one license of Act! per user. Your system must meet the minimum requirements to be eligible for technical support.

SQL Server Edition Recommendations

SQL Express limits CPU cores/sockets, memory used by SQL and the size of your data file to 10GB. For this reason, we recommend SQL Standard for any deployment over 20 users or 2GB in size. Individual performance may vary based on actual database size, hardware variations, and product usage.
